

Seeding Generator

OPTOLUTION Messtechnik GmbH

The Seeding Generator produces aerosol for PIV or LDV applications.

Main Features:

- 230 V AC operation
- Cost-effective design
- Designed for DEHS and other seeding materials (e.g. PIVlight)
- Flow rate: about 40 l/min
- Silent operation (49 dB)
- Custom, e.g. battery powered solutions available
- Optionally remote controlled from PIVlab

Particle diameter distribution
